**Object:** summer internship application

Dear Sir/Madam,

4<sup>th</sup> degree software engineering student at Esprit, after studying 2 years of common core in a preparatory school major mathematics and physics then 2 years of computer science engineering, I am searching for a summer internship to improve my skills.

The courses I have taken and the projects I have made within the university let me acquire not only software skills but also finance and data analysis skills.

I have heard about your company and its good reputation and I am highly interested to work with your team within a summer internship so I could evolve and develop my qualifications.

I look forward to hearing from you and remain at your entire disposal for any further information. Thank you for your consideration.

Yours sincerely.
