**Subject : Applying for summer internship**

Dear sir/madam,

I am writing to apply for an internship in Artificial intelligence within your highly reputed company.

I am Chayma BEN DHAFER, a 4th-year student at the National Institute of Applied Sciences and Technology (INSAT), majoring in Software Engineering and minoring in data science. I would like to emphasize to you the great interest I have in mathematics, statistics, and the field of data science in which your honorable company specializes.

My Passion for Data encouraged me to choose data science as my specialty for the 4th and 5th year at INSAT, A specialty that I want to apply and deepen as an intern member within your teams.

Eager to learn and to broaden my knowledge, I participated in the AI Hack Tunisia 2019 and I worked on several projects such as my year-end project which is about hyperspectral image classification. Also, I took advantage of the quarantine to continue learning and to complete the specialty in Deep Learning online.

I am Dynamic, rigorous, endowed with a critical reactive spirit. I love challenges that enable me to explore my potential.

Particularly interested in working at Onboard, I put myself at your disposal throughout the period of this internship.

Please find attached my resume for consideration.

Thank you for your time and consideration. I look forward to hearing from you.

Chayma BEN DHAFER
