Are you involved in community work? Provide details

I am very active in community life. Since 2012, I have joined several clubs and associations and I have even held positions there. In fact, I was a member of the humanitarian association AFREECAN, organization manager in the club IHEC EVENTS, Vice-President in the club HEC ENTREPRENEURS and even I founded my own club HEC FINANCE ACADEMY to spread the financial culture among students. In addition, I participated in entrepreneurial

programs like Open Startup Tunisia, AFLATOUN and AIINOV. More and more interested in associative world, I have lived many rewarding experiences that allowed me to grow up, develop my knowledge and skills, forge my personality and broaden my vision.

Where do you see yourself in 3-5 years? Describe please

I am really passionate by the entrepreneurial world. I want to discover all its sides and components so I want to spend 3 to 5 years requiring different experiences in the various actors of the Tunisian entrepreneurial ecosystem: incubators, accelerators, social initiatives, entrepreneurial program... I really want to discover the secrets of this magical universe that attracts me. Then, I will create my own startup, my own entrepreneurial journey.

Which type of internship are you looking for ?

Any time of the year training.

Why did you choose Flat6labs company? What did you consider in setting your priorities?

I am interested in the entrepreneurial accompaniment. So, I always participate in events organized by incubators or accelerators or even coworking spaces to discover more these entrepreneurial structures. Make contact with passionate young people who work on amazing ideas and help them to realize their dreams and create their own startups, was a real challenge for me and a motivational factor. To meet this challenge, I chose Flats6lab.

In fact, I had the chance to know this accelerator in the context of my studies and I was impressed by the atmosphere, the working method, the owners, the startups that exist ... I felt in my own universe.

What do you think your added value would be as an intern in the chosen company?

I will Help Flat6labs to build the community of OSTX. OSTX is a common project between Flat6labs and Open Startup Tunisia. In fact, it's an entrepreneurial competition for high potential students. OSTX is an extension of the OST program. It brings together cross-disciplinary from schools within the same university to develop ideas for innovative start-ups solving global challenges. The winning team in OSTX and also the other interesting startups will be fast tracked in Flat6labs.

“Alone, we can do so little; together, we can do so much”. I believe that the heart of each entrepreneurial program is its community. Thanks to this community, Flat6labs will promote its activity, recruit new startups and even create new strategic partnership.

What are your strengths?

Every human being has strengths and weaknesses. I also have both. If you allow me, and with all modesty, I will quote some of my strengths. Perseverance is my highest quality I never give up whatever difficulties. I have the sense of the engagement , I am organized and so perfectionist. I am so creative and I think always out of the box. Finally, I am proud to have the entrepreneurial spirit in me.
