To whom it may concern,

I am submitting my resume and cover letter for consideration for the summer internship program. I believe my research and professional experience make me an ideal candidate for your internship program.

I have had a great deal of research experience in chemistry and engineering, both in the lab and in the field. Most of my experience is in environmental field studies. In my three years at The Faculty of Sciences of Tunis, I've completed a great deal of coursework on all areas of chemistry from organic chemistry, analytical, inorganic, and environmental chemistry. Currently, as a metrology & quality engineering I have had courses on quality (NORME ISO 9001 & ISO 17025), ISHIKAWA Diagram, 5M, Mathematical modularization, quality control, validation of analytical methods, dimensional metrology, electrical metrology, chemical metrology, energetic metrology....)

In August 2018, I worked as a quality assurance intern at a pharmaceutical firm "Hikma Pharmaceuticals". For my end of studies project, I worked as a research intern at the laboratory of experimental medicine at the Faculty of Medicine of Tunis. I conducted several analyses of the molecule that we have synthesized and conducted a series of tests for the biological and chemical effects of those molecules.

I believe that I would be an asset to your program. This internship would provide me with the ideal opportunity to assist your organization and to expand my professional skills.

Thank you for your consideration.

Sincerely,

Naoures Khedri
