

Hello SQOIN Team,

I have seen the internship opportunity on a social media platform and I found it interesting. And I have been planning my future career on blockchain and I have connections around the world who are really working closely on crypto currencies. This is why I am applying for the internship.

As Business Development intern I will be in contact with both local and international blockchain & cryptocurrency startups to ensure growing of SQOIN. I am a hardworker person and creative that enables me to push my limits when it comes to business as I have experience in the past at other companies as an intern. Blockchain and cryptocurrency industry is moving real fast in the world and as a fast learner and adaptive to the new environments I think that I will grab the position requirements and hard-skill knowledge real quick. Previously I took different roles at volunteering and management that will be really effective as a team member.

In addition to these, I have contacts at companies such as Coinmarketcap, Bibox Exchange etc.

Thank you,

Sincerely,
Maissa Attyaoui
