

2020 TAEF Fellows - Student Evaluation

When completing the evaluation below, remember that it is important to give serious thought to the rankings. If more space is needed when completing the comments section, please add additional sheets. The goal of the evaluation is twofold.

1. To provide the opportunity for students to give constructive feedback on all aspects of their professional fellowship.
2. To provide information that will be helpful to future students considering a fellowship with that organization.

COMMENT SECTION

1. How did your TAEF fellowship experience help you grow personally and/or professionally?

This internship was technically my first real work experience, it helped teach me patience, perseverance and further improved my attention to detail to ensure work was done flawlessly.

On a personal level, it taught me how to control my expectations and my emotions but also how to maintain personal and professional ties with certain people, but on a working level it taught me communication coordination and certain attitude must-knows when it comes to dealing with partners and external parties.

2. What previous classes or classroom experiences were most useful in preparing you for your fellowship?

3 courses come to mind that had helped me greatly throughout this internship, first it would of course be the marketing class that introduced different aspects that can help a person construct a marketing approach, second would be the communication skills course, as my position was communication and marketing, the different perspectives this course demands that you have certainly helps when addressing different personalities and attitudes and allowed me to be able to build my responses accordingly. Third would be the management class as it has introduced many analysis tools that help analyze a company's position as well as in improving personal and team-based efficiency and effectiveness

3. What advice would you give future fellows?

My advice would be to keep going and persevere, if you do not know how to do something on the spot, take that as a chance to learn it. Use the internship as a learning guide to further improve your skills and knowledge from your own side and do not be afraid to tackle big challenges

4. Would you consider doing a fellowship at this company again? Why or why not?

Yes, I would. Although the experience was a little intimidating and morally tiring at first, it has helped me develop personal skills that will definitely help me on the long run but also taught me trust and belief in the work of my supervisor and the things they do. I also got introduced to a very specific niche, the digital arts one, and have managed to almost fully understand how things are currently going within it.

The points I mentioned allow my work at this company to go much more smoothly and allow for a better return from myself the longer I stay and grow.

5. What kind of training would you like to have in the Fellows Program?

Hard skills trainings such as data visualization, data analytics, copywriting, creative writing and content creation.

And soft skills such as emotional intelligence and problem solving.

6. Please include any other comments or information you feel would be helpful.

7. May we use this in promoting fellowships to other students? Yes / No
