

To whom it may concern,

As a junior student pursuing a bachelor degree in business administration with a major in Business Analysis and a minor in International Political Economy, I am eager to take the steps in the direction of building a value-full career.

I have great interest in spending my summer internship as a data analyst intern at Flat6Labs learning and offering my knowledge. I look forward to the opportunity to work with such a renowned program, where I am confident that my potential will be maximized and my growth will be exponential.

As a member of the Flat6Labs community, I could offer a creative problem solving approach, open-minded analysis, leadership abilities and very effective teamwork skills. To elaborate on my leadership qualities; during my exchange year in Southeast Missouri State University, I was selected among a large pool of applicants to participate in an intensive leadership program entitled "Emerging Leaders" which further shaped my devotion and sense of commitment.

I believe that I would be a good fit for your company because I have good problem solving skills, a methodical approach, excellent attention to detail skills and the ability to work to strict deadlines. I am also a good communicator and work well with others to complete goals.

Please refer to my resume for additional information regarding my proficiencies and achievements. I am positive that I will be a great addition to the team I will be working with. I can be reached at +216 58 894 040 or at nadabouker@hotmail.fr .

I look forward to hearing from you. Thank you for your consideration.

Yours sincerely,

Nada Bouker
