

2020TAEF Fellows - Student Evaluation

When completing the evaluation below, remember that it is important to give serious thought to the rankings. If more space is needed when completing the comments section, please add additional sheets. The goal of the evaluation is twofold.

1. To provide the opportunity for students to give constructive feedback on all aspects of their professional fellowship.
2. To provide information that will be helpful to future students considering a fellowship with that organization.

Name of the Fellow: Aumayma Jebil

Company: Flatlabs Tunis

Supervisor: Mrs Faten Missi

COMMENT SECTION

- 1. How did your TAEF fellowship experience help you grow personally and/or professionally?**

The TAEF fellowship program helped me get a taste of what it feels like to be part of a professional work environment at a young age. Even though my internship wasn't enjoyable, I learnt to never give up even if it's tough, I made amazing friendships and discovered new things about myself.

- 2. What previous classes or classroom experiences were most useful in preparing you for your fellowship?**

I think that overall my learning journey was very useful in preparing me for my fellowship. I needed every aspect of my learning process and I can't exclude any class or classroom I've taken. Hard skills and soft skills are both of them essential.

- 3. What advice would you give future fellows?**

I would advise them to ask as many questions as they can, to never feel intimidated. Also, they are still young and inexperienced so it's totally fine to make mistakes and seek help from others.

- 4. Would you consider doing a fellowship at this company again? Why or why not?**

I would consider doing a fellowship at this company again but not in the same department. Given the fact that ~~my~~ I got to know about the program department thanks to other interns and also enjoyed the overall climate of the company.

- 5. What kind of training would you like to have in the Fellows Program?**

I think that having trainings on hard skills such as project management, data analysis, computer technology will be beneficial.
