Object: Cover letter for a Summer Internship application

Dear Mrs Ben Yahia,

Being always passionate about data science, I intend to continuously improve and widen my computer skills. I find it a very challenging and interesting field to discover and I know I can be a good fit in your school as I am driven by my ambitious and eagerness to learn more.

I successfully finished three years of my engineering studies. I succeeded the Tunisian national competitive examination for entrance to engineering schools, and I am currently at my 4th year of engineering cycle in Computer science specialty Software engineering at ESPRIT (Private Higher School of Engineering and Technology).

Indeed, I have oriented my choice since my young age, from high school to university, in the field of computing. This choice is guided by my passion for this sector and its importance in technological, economic and social development. So, I would like to underline that I am determined to take advantage of every opportunity to integrate your school in order to enrich my knowledge and to make use of my skills and abilities with the sole aim of reaching excellence.

Working in a successful Company such as Proxym, would be an important opportunity for me to acquire a complete training and have all the assets in a field that I am passionate about. I am convinced that the working method you propose will prepare me optimally for the achievement of my objectives.

Dynamic, rigorous, versatile and with an enthusiastic 'can do' attitude, I want to assure you of my motivation and my deep desire to work with you. With a good command of French and English languages and a good computer science knowledge thanks to an intensive personal work, I am confident that I am well prepared to be the ideal intern.

In order to glimpse some of my experiences, I invite you to consult my vital curriculum. Convinced that a letter cannot completely reveal my real motivation, I hope to show you my interest even more during an interview.

I would like to thank you in advance for taking the time to consider my application. I look forward to receiving your positive reply. Should you have any questions, I will be pleased to answer them.

Yours sincerely,

Rania ZIDI
