

Dear HR Manager,

I write in response to your TAEF internship program application in seeking IT interns at the Exo company. As a highly competent IT student, I would bring a resourceful, keen, hardworking attitude to this role.

You mentioned in your advert the need for candidates to know how to conceive and implement an E-learning system and build platforms and tools to develop automation. I believe that my technical experience and education will enable me to precisely match your requirements.

I worked as an intern for six months with the company U-Accelerator whose mission is to turn raw ideas into innovative projects and foster the emergence of startups. My job consisted of assisting participants in developing their business plans and building viable strategies; and connecting them later on with field-experts to prepare for the market integration of their businesses. I am a self-starter and have a knack for problem solving and event planning. I am also deeply familiar with Java, Java Script, and VB.NET. I am confident that I can put my skills to use for your vacancy, and yet continue to improve upon them as I learn from one of the most recognizable industry names in the world.

Thank you for taking the time to consider this application and I look forward to hearing from you in the near future.

Sincerely,

Sabrine Lamouchi
