

Dear Sir/Madam,

I am submitting my application for the summer internships at Flat6Labs in Tunis. I am hoping I can join your team for this experience.

I am a final year student at Paris Dauphine Campus Tunis. In my three years of education, I had the opportunity to attend lectures given by outstanding teachers regarding different subjects such as management control, operational research and strategy. These are the theoretical knowledge that I acquired. I also had the chance to work, last summer, in two different companies. These experiences were the fundamentals for understanding the demand of work and learn several administrative procedures as well as discover the different departments of each company.

This year, I wanted to do something different. I am interested in learning more about entrepreneurship in Tunisia and its ecosystem. I am eager to learn the process of creating, developing and financing start-ups. I also want to work in a dynamic environment, that encourages initiative and creativity. And this is why I want to join Flat6Labs.

I look forward to hearing from you.

Best regards,

Yasmine Ziedi.
