I am submitting my resume for consideration for the summer Data science and Modeling internship program at Moome Company. Given the skills and experience outlined in my enclosed resume, I believe I will be a worthy asset to your team.

I am currently a second-year undergraduate student in the higher school of communications of Tunis and I am looking for a summer internship to develop and put into practice my various technical and theoretical knowledge.

During these two years of study, I was able to discover different programming languages in software development such as C ++, python, Java, SQL, and web development with HTML, CSS, JavaScript. I' am also very interested in deep learning and machine learning so currently I'm taking courses in coursera in deep learning and I got a machine learning certification recently.

However, this academic knowledge cannot be valued without practical experience. An internship in a company such as yours would allow me to implement and enrich many skills and professional practices seen in class, through an application of this knowledge on a project.

I believe I would make an excellent addition to your team. This internship would help me grow my real-world experience in the technology industry and help me further develop and refine my Data science skills.

I look forward to hearing from you!

Sincerely,

Zribi Zahra
